

Ruhban Abdullah

BACKEND DEVELOPER / SOFTWARE ENGINEER

Sopore, J&K, India | +91 6006292134 | shahruhban01@gmail.com

GitHub: <https://github.com/shahruhban01> | LinkedIn: <https://www.linkedin.com/in/shahruhban>

SUMMARY

Backend Engineer experienced in designing scalable APIs and real-time systems serving 10,000+ users. Strong in Node.js, distributed backend design, and AWS infrastructure with focus on performance, reliability, and high-concurrency systems.

EXPERIENCE

Backend Developer – FoodHung

(Aug 2025 – Present)

- Architected and developed RESTful APIs using Node.js and Express.js supporting 10,000+ users and handling ~200–400 requests/sec
- Optimized MySQL and MongoDB queries using indexing and query tuning, reducing average response time by ~25–35%
- Improved API performance by implementing pagination, caching strategies, and efficient data access patterns
- Deployed and managed backend services on AWS EC2 with auto-restart and monitoring, maintaining ~99.5% uptime
- Integrated CI/CD pipelines, reducing deployment time by ~40% and minimizing manual errors
- Diagnosed and resolved production issues, improving system reliability and minimizing downtime

Software Engineer – World Social Integration

(Jun 2024 – Jul 2025)

- Built backend services using Node.js, PHP (CodeIgniter), and MySQL supporting 1500+ concurrent users
- Implemented REST APIs and WebSocket-based communication for live user interactions
- Scaled backend systems to support 1500+ concurrent users with real-time data flow
- Managed AWS-based deployments and backend infrastructure for production environments

PROJECTS

PiCloud – Cloud Storage Backend API

GitHub: <https://github.com/Shahruhban01/picloud/tree/main/backend>

- Designed and built a scalable cloud storage backend using Node.js, Express.js, and MongoDB
- Implemented chunked file upload system supporting large files (up to 500MB)
- Engineered JWT-based authentication with dual-token session handling for secure access control
- Developed file sharing, pagination, filtering, and rate limiting mechanisms
- Implemented HTTP range-based file streaming for efficient large file downloads

SKILLS

- **Languages:** JavaScript, C
- **Backend:** Node.js, Express.js, PHP (MVC), REST APIs, WebSockets
- **Database:** MySQL (Amazon Aurora), MongoDB
- **Cloud & DevOps:** AWS (EC2, S3), CI/CD, Deployment Pipelines
- **Concepts:** Data Structures, OOP, API Design, Scalable Systems

EDUCATION

Bachelor of Computer Applications (BCA)

Govt. Degree College Baramulla (Autonomous)
